Subject: Re: Dimock IDW - Waste Profile

Rich,
I knew I was forgetting something, as I had wanted to talk to you about that.
The soil was in the waste profile because a small portion of the liquid waste material had spilled out on the ground. The sampling team scooped up the soil where the liquid waste has spilled.

Suddha, I have asked Rich Rupert to help me review this. Why do we have soil in this sampling waste when we didn't sample soil?

Rich

Subject: Dimock IDW - Waste Profile

Hi Rich,
We are coordinating the disposal of the drum of IDW from Dimock. We have a disposal firm identified and as part of the process we need to prepare a waste profile. We have it completed and it needs signed by you. Once it is signed a manifest will be generated, which will then be sent to you for signature. Please review and sign the attached waste profile. A scan copy with your signature will be acceptable.
Please let me know if you have any questions.
Thanks,

Suddha Graves
